❖ Work Experience

- **Domamo Technologies Ltd., Abuja** – PHP Developer (May, 2024 – Date)
- **Freelance Software Developer** (2018 – April, 2024)

❖ Projects

- **Veel.tv:** Collaborated with an Australian partner in building Veel.tv, a video streaming web app. Here, I was majorly involved in using PHP to build the backend architecture and developing APIs.
- **SeamlessAudit:** I was contracted to build an audit management system for a top Nigerian commercial bank. This system aimed to streamline audit planning, management and monitoring ensuring auditors were more productive. The languages used were HTML, CSS, JavaScript, Bootstrap, JQuery, PHP Laravel, MYSQL.
- **ittyURL:** I was contracted to build ittyurl.com, a URL shortening service that enables anonymous link creation, QR code generation, link analytics, etc. The languages used were HTML, CSS, JavaScript, PHP, MYSQL and a couple other frontend libraries.
- **Kondle:** I was contracted to build Kondle, a content management system that enabled multi-user registration and sharing of content (free, premium and password protected). In other words, Kondle was a blogging CMS that enables users to share posts, images, videos and define who can access such content.
- **Student eVoting Portal:** I was contracted by the University of Port Harcourt, accountancy department to build an electronic voting system for the department's students union government elections.
- **Others:** Personally, I have built and experimented with projects such forum scripts, ecommerce scripts, blogging scripts, video tube scripts, electronic examination/assessment systems, etc.
